

Teaching Faculty Positions in the Department of Electrical and Computing Engineering at SUNY Korea

The Department of Electrical and Computing Engineering at SUNY Korea invites applications for multiple lecturer positions in all core areas of Electrical and Computer Engineering, including but not limited to the areas of signal processing and communications, machine learning, computer architecture and systems, and VLSI. Successful candidates must have earned a Ph.D. degree from a US institution in Electrical Engineering or a closely related field with a strong commitment to undergraduate education. Fluency in English as well as some experience within higher education in the USA, such as teaching, research, or studies in an American university are essential.

SUNY Korea is committed to delivering a high-quality undergraduate program in Electrical Engineering while providing the full American university experience in Korea. The degrees at SUNY Korea Electrical Engineering are granted by the Stony Brook University (SBU) of SUNY. For further information please visit www.sunykorea.ac.kr.

Current positions are targeted at the teaching faculty levels. We seek candidates with the potential to develop significant and internationally recognized programs, actively contribute to the core undergraduate teaching missions of the department, and who will serve the university and the community. All applications should be submitted electronically in PDF format. Review of applications will continue until the positions are filled.

Submission instructions

The following required application materials must be submitted electronically to eceseach@sunykorea.ac.kr in a **single** PDF file containing

- Cover Letter
- Curriculum Vitae
- Teaching Statement
- Copy of Academic Transcripts, and Degree Certificates from all colleges and universities attended
- Names, Titles, and Contact information of at least two references.

Note that the original university transcripts will be requested at the time of appointment.
